Skills

Hard Skills: Java, Python, Javascript, SQL, AWS Fundamentals, React, Django, Supabase, React Native, Flutter

Soft Skills: Confidence, Adaptability, Growth Mindset

Projects

PCOS Prediction & Health Assistance System

Sept 2025 – Present

Developed an AI-powered healthcare platform for early PCOS risk assessment using ensemble machine learning, achieving **85.37% model accuracy**. Built a full-stack React application with an interactive health dashboard, personalized recommendations, symptom tracking, AI meal analyzer, chatbot, and secure Supabase authentication.

Tech: Python, Ensemble Machine Learning, React, Supabase, SMOTE, Pandas, Scikit-learn

Recyclo – Smart Waste Management Platform

Feb 2025

Developed a full-stack smart waste management platform with geo-tagged waste reporting, eco-learning modules, games, and an AI-powered sustainability chatbot, promoting community participation and environmental awareness.

Tech: React, Django, Python, PostgreSQL, Google Maps API

HomeEase – Home Management App

Feb 2026

Built a Flutter-based platform for household management through shared chores, room-wise tasks, supplies, shopping lists, and bill tracking, with multi-user synchronization, reminders, and a centralized dashboard.

Tech: Flutter, Dart, Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Provider

Experience

Blockchain Developer – Secure Ethereum Auction Smart Contract | KJSSE

May 2025 – July 2025

Developed and deployed a secure Ethereum auction smart contract, implementing and evaluating **2 DoS mitigation strategies**—Pull-over-Push and CEI—across **15+ test deployments on the Sepolia Testnet**. Co-authored an IEEE research paper based on the security and gas-cost analysis.

Tech: Solidity, Ethereum, Remix IDE, Sepolia Testnet, MetaMask

RESTful API Development | Tata Consultancy Services

May 2026 – July 2026

Developed a RESTful Employee Management API using Java 21 and Spring Boot, implementing **5 REST endpoints** for CRUD operations with PostgreSQL integration. Added Swagger/OpenAPI documentation and Docker-based containerization for deployment.

Tech: Java 21, Spring Boot, REST APIs, PostgreSQL, Swagger (OpenAPI), Docker

Web Development Intern – BMC Villa | KJSSE

July 2026 – Present

Developed a responsive full-stack villa booking web application with room browsing, reservation management, real-time availability tracking, and user authentication using React-based technologies.

Tech: React.js, CSS, React Router, Supabase, JavaScript, Git

Education

Class X (ICSE): 97.4% | **Class XII (ISC):** 95%

B.Tech. Computer Engineering: KJ Somaiya School of Engineering (2023 – Present) — **CGPA: 9.23**

Honours: Software and Mobile App Development (2024 – Present)

Achievements

IEEE Research Publication: Co-authored “*Comprehensive Analysis of Mitigation Strategies for Denial-of-Service Attacks on Smart Contracts*,” analyzing mitigation strategies for DoS vulnerabilities in smart contracts.
